Profile

Frontend Developer with proven expertise in building scalable, multilingual web applications using modern React ecosystem technologies. Demonstrated proficiency in React.js, Next.js 15, and advanced state management solutions (Redux Toolkit, TanStack Query). Specializes in creating high-performance, accessible user interfaces with Tailwind CSS while ensuring seamless API integration and optimal user experience. Committed to delivering innovative, user-centered solutions in collaborative development environments.

Technologies and Skills

- **Programming Languages**

C, JavaScript (ES6+), TypeScript

- **Frontend Development**

React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, SASS, Bootstrap, Tailwind CSS, jQuery, Redux, Redux Toolkit, React-Hook-Form, Formik, Yup, MUI, Shadcn, RESTful APIs, Axios, TanStack Query, React Context API, zustand.

- **Tools**

Git, GitHub, GitLab, Jira, ClickUp, Slack, Agile, Figma, Adobe XD

Work Experience

Al-Masader Al-Raqmiyah, *Frontend Developer*   02/2025 – present

- **Developed and delivered 10+ production websites** using React.js, Next.js , and TypeScript, serving diverse client requirements and business objectives
- **Implemented performance optimization strategies** including lazy loading, code splitting, and image optimization, resulting in measurably faster load times and improved Core Web Vitals
- **Designed and built accessible, mobile-first interfaces** leveraging modern CSS methodologies (Sass preprocessing, custom CSS, Tailwind CSS) and ShadCN UI component library, ensuring compliance with accessibility standards
- **Architected robust data management solutions** by integrating RESTful APIs with Axios, implementing efficient caching strategies with TanStack Query.
- **Collaborated effectively** with cross-functional teams to deliver high-quality, user-centered web solutions

Route Academy, *Frontend Intern*   09/2024 – 02/2025

- Developed responsive web apps with **React**, **Next.js**, and **JavaScript** (**Vanilla**/**TypeScript**).
- Built **scalable UI** using HTML, CSS, Tailwind CSS, and reusable components.
- Integrated **RESTful APIs** and optimized UX with fast, smooth performance.

Projects

Linkedin clone ⧉
Tech Stack: Next.js, TypeScript, Axios, TanStack Query, Tailwind CSS, shadcn/ui, React-hook-form, Zod
A full-featured social networking web application built using **Next.js 15**, supporting user authentication, post creation, commenting, reporting, and dynamic content updates — designed for speed, responsiveness, and security.

Cartify ⧉
Tech Stack: React, Tailwind CSS, Axios, Formik, Yup, React Router Dom, TanStack Query
A fully functional e-commerce web application built with React, Tailwind CSS, React Router Dom, Axios, Tanstack query, Formik, Yup, and various libraries to provide a seamless shopping experience. The app includes user authentication, product browsing, filtering, cart management, order placement, and checkout functionality.

Dashboard-Trainer-Management ⧉
Tech Stack: React, TypeScript, React Router, Tailwind CSS
Application Dashboard A modern web application designed for managing educational courses with full CRUD functionality. Built using React and React Router, the dashboard allows admins to create, view, update, and delete course details in a clean, responsive UI.

Portfolio ⧉
Tech Stack: React, Tailwind CSS, Redux Toolkit
This portfolio, built using React, Tailwind CSS, and Redux Toolkit, serves as a professional showcase of my skills, experience, and projects. The application features a dynamic and responsive design.

Education

Faculty of Engineering, *Department of Computer and Systems Engineering*   10/2019 – 07/2024
